

Powered by the strength of community

Thousands of midsize employers have left traditional health insurance behind to join the ParetoHealth revolution.

At ParetoHealth, we unite employers with 50 to 1,000 employees into a powerful, like-minded community that eliminates volatility and drives down health benefits costs. As the largest and fastest-growing community of its kind—three times larger than any competitor—we deliver unmatched scale that empowers employers with risk protection and negotiation leverage that's simply unattainable on your own.

Our Risk Shield

Pareto's Risk Shield offers the best protections on the market—making costs predictable year over year. It shields your business from large claim volatility so you can focus on building a long-term cost containment strategy.

Our Savings Engine

The Savings Engine is a turnkey platform designed to reduce healthcare costs by addressing the underlying drivers of claims, while providing access to a trusted partner ecosystem and a clear long-term strategy to improved financial outcomes.
